

Algorithmic Elections

Sarah M.L. Bender

J.D. Candidate & Darrow Scholar
University of Michigan Law School

Roadmap

- How AI is being used to administer U.S. elections
 - Potential concerns
 - Takeaways for policymakers & election officials
-

1. Voter Roll Maintenance

- Name-matching
- Interstate cross-checking

2. Signature Matching

BALLOT

Frank D. Conklin

Henry W. Halifax

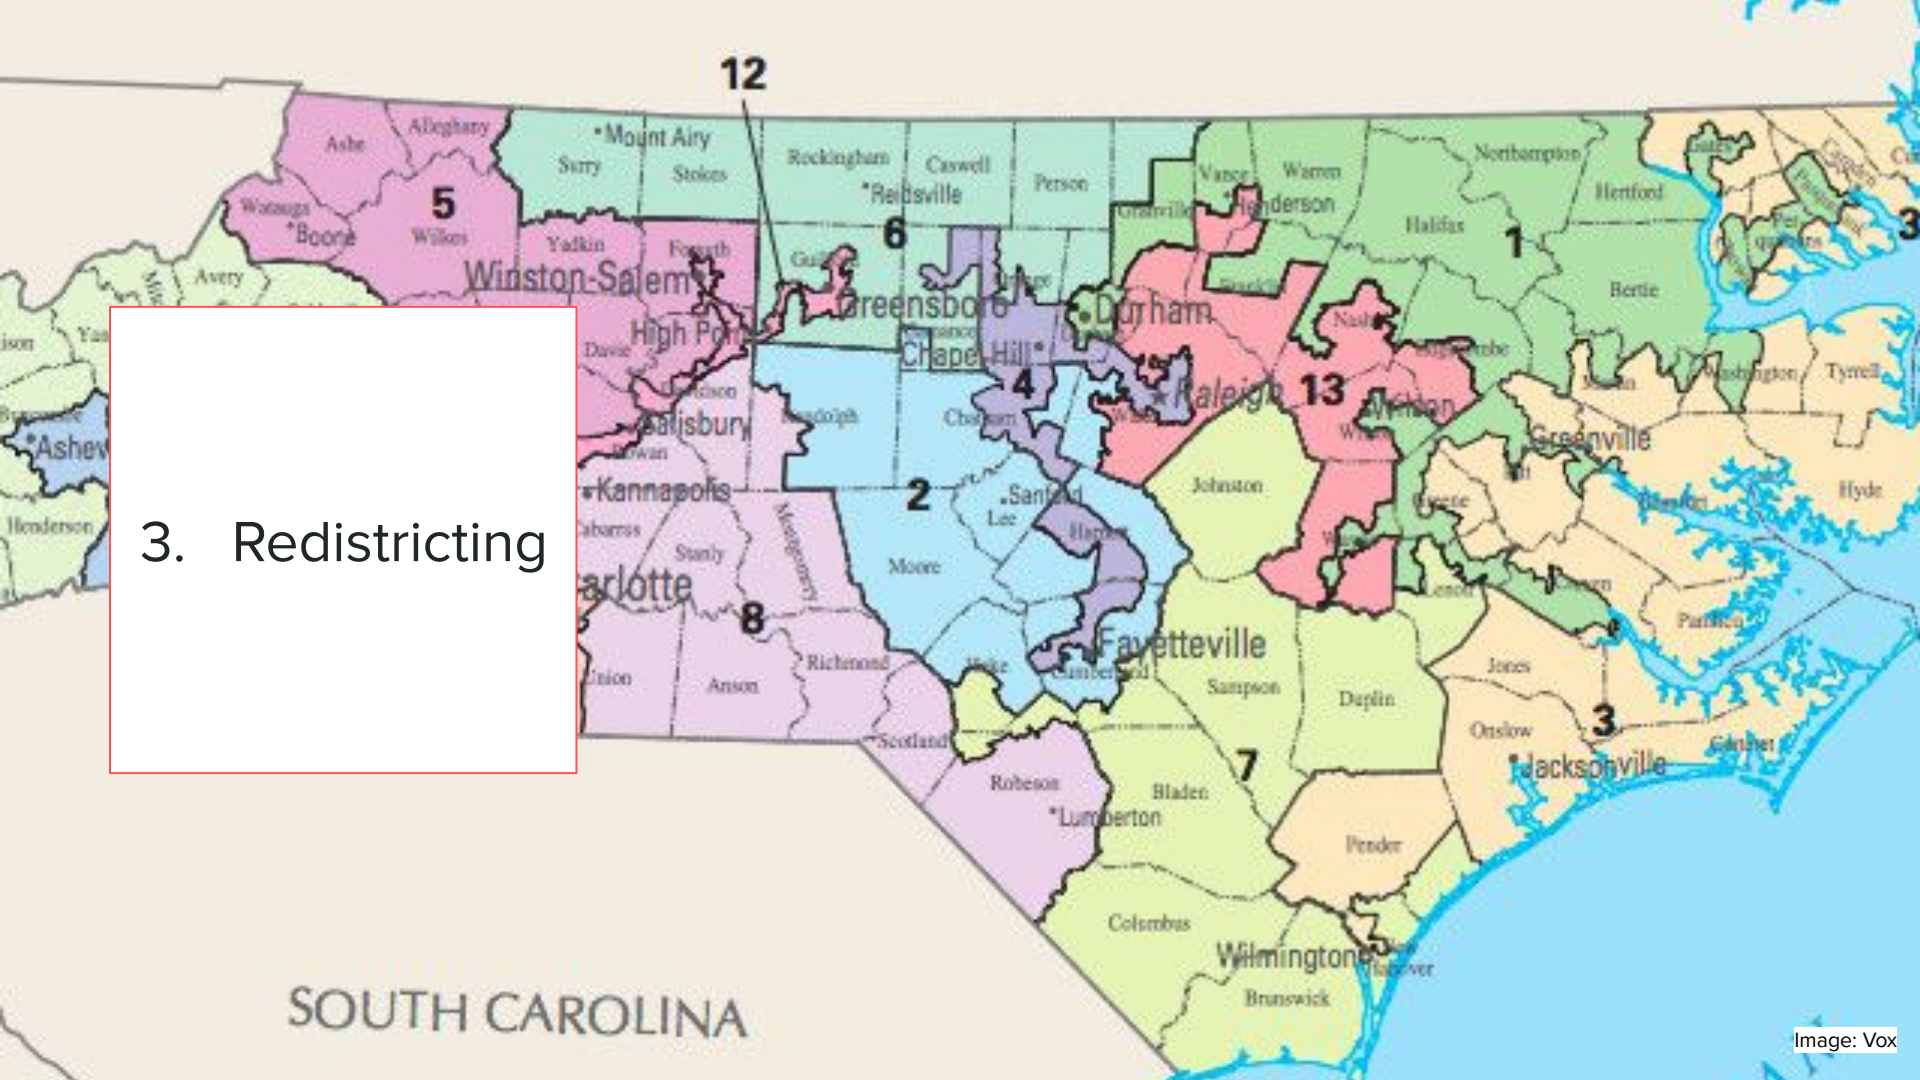

Rosalie W. Wisfeld

VOTER FILE

Frank D. Conklin

Henry W. Halifax

Rosalie W. Wisfeld

3. Redistricting

SOUTH CAROLINA

Potential Pitfalls

- Inaccurate & biased results
- Misuse & automation bias
- Lack of transparency

Takeaways

Thank you!

Sarah M.L. Bender
slbender@umich.edu

- Oversight is needed
 - Oversight must be ongoing
 - AI users must be trained
-
